

# A Performance-Improvement EDIS

CMR is comprehensive and easy to use by ED clinicians, department managers and administrators. Ensuring efficient data capture at the point of care and along the continuum improves compliance, performance, productivity, patient care and safety.

CMR's solution allows EDs to:

- Generate positive ROI
- Boost eligibility for stimulus and reimbursement dollars
- Meet administrative reporting requirements with more than 90 standard reports
- Ensure facility-specific documentation requirements and workflows are addressed
- Improve efficiency, quality metrics and risk management with best practice patterns and clinical pathways incorporated into the design
- Facilitate regulatory compliance, including TJC, CMS, EMTALA and HIPAA
- Ensure accurate charge coding to significantly increase revenue

CMR simplifies administrative workflow to expedite coding and billing. More accurate charge capture and documentation optimizes reimbursements and boosts ROI, increasing the overall revenue of the ED.

CMR captures and reports clinical, financial and operational data quickly and efficiently so you can manage the business of emergency services more effectively.

# CMR Product Summary

## Tracking

- Patient Tracking
- Maximum communication between clinicians evaluating the same patient
- Visual indicators showing patients, pending orders, and overall ED status at a glance
- Integrated environment for managing patient care
- Flexibility for printing specific elements of the patient chart without printing the entire chart
- Filtering by department and by specialty (for patients with consultations)
- Whiteboard search capability using text strings (partial names)
- Census monitoring by department and by ED sub unit
- Resource management (e.g., placing rooms on hold for EMS)
- Temporary room creation (e.g., hall1, hall2)
- Manual loading of patients using the HIS bypass application allowing continued use of CMR during HIS downtime procedures or unplanned network outages

## Clinical Documentation

- Triage Notes
- Nursing Documentation
- Physician Documentation
- Ancillary Services Documentation

## Charge Capture

- Facility Charge Capture
- Professional Fee Coding Report

## Image Capture

- Scanning and Attaching Embedded Forms
- Patient ID and Insurance Cards
- Anatomical Diagrams
- ECGs
- EMS Run Reports
- Photographs

## Order Management

- Order Entry - Lab/Radiology/Cardio/Respiratory/Meds and IVs

## Medication Management

- Allergy and Drug/Drug Interaction Checking
- Medication Reconciliation

## Discharge Planning

- Discharge Instructions
- Prescriptions
- School/Work Excuse
- Transition Summary

## Electronic Signature Requirements

- Ensures all signatures for orders are present
- All orders are acknowledged and resulted

## Comprehensive Documentation Compliance

- Configurables for facility to ensure compliance with Quality measures
- HPI, PFSH, ROS and PE are completed with required level of documentation
- Never requires a chart to be returned for completion
- Start and Stop times for IVs captured

## Reporting

- Enhanced Audit Trail
- More than 90 standard reports
- Standard and Custom Reports
- Meaningful Use Reporting

## Interfaces

- ADT/Patient Demographics
- Bi-directional Lab and Radiology Orders
- Cardiology Orders
- Continuity of Care Document (CCD)

For customers who wish to obtain meaningful use certification with CMR EDIS v3:

Support for integration of this certified product-version with a hospital's lab in order to meet *§170.314(b)(5) – Incorporate Lab Tests & Values/Results* may require additional one-time costs.

Meaningful use compliance for the above measure is included in our standard lab integration package.
